To whom it may concern,

In 2017 SM Engineering knocked on our door and offered their unique services. With our permission they would look into our monthly utilities bills searching for legal cost reductions and possibly a refund on past moneys paid out. This service was to be performed for the customer with no costs up front and an agreement that SM Engineering would receive a percentage of all moneys saved and refunded to our company. To this end a contract was signed. SM Engineering went to work and after several months Apex was paying a reduced monthly Electrical utility bill and also received a substantial refund check. This was a win-win for our company because our staff invested none of their time and energy in an attempt to accomplish what the professionals at SM Engineering do for a living. Our management is pleased with the results and would recommend SM Engineering to other companies and corporations.

Sincerely,

Robert Curran  
Facilities Manager
