In the past I've worked with vendors trying to save on energy consumption. SM Engineering compliments those audits well. I've worked with SM Engineering before with a different company and recommend you use their services.

After SM Engineering analyzed our utilities we were able to save several thousand dollars on many of our properties. If you're on unsure about having it done, just look at the evidence. It's worth hiring the expertise.

Sincerely,

A handwritten signature in black ink, appearing to read 'Stephen Perillo'. The signature is stylized with a large initial 'S' and a circular flourish.
