SM Engineering

Bravo! Thank you to Jim and everyone at SM Engineering for their efforts in combing through our utilities and recouping over \$9,000 in overages. We've tried twice to find some of these breaks and were unsuccessful in the past.

A+ Service, communication and professionalism. We highly recommend SM Engineering for every business. They not only recovered years worth of overages but applied their knowledge to make sure our accounts are recieving all savings going forward.

Before proceeding we reached out to several of their clients through testimonials and the feedback was candid and encouraging. Feel free to contact us for a clients perspective on the work done by Jim and SM Engineering.

We appreciate and support your efforts!

Sincerely,

Lu Simmons
